

PRESSURIZED CONTAINERS LOW PRESSURE PUMP

Ideal for the use of large amounts of product, suggested for wood industry, carpentry, industrial painting, for the application of vinyl and neoprene glues, tar, abrasive pastes and liquids.

Considering the dimensions the product can be poured directly into the tank or placed inside its own container to avoid cleaning. No special maintenance requirements.

A 30 lt/min. low pressure pump has been added to the range in order to facilitate work on large surfaces, ideal for any type of use.

SSP 24 AP

For a high quality paint job we recommend the use of products manufactured by Walmec S.p.A., for the accessories of pressurized containers.

SSP 5

- **Container and fluid passages:** stainless steel
- **Product pressure regulator**
- **Coupling for 1 spray gun**

REF.				
90015	9 lt	4 Kg	M 1/4"	M 1/4"

SSP 20

- **Container and fluid passages:** stainless steel
- **Product pressure regulator**
- **Coupling for 1 spray gun**

Pressure inlet regulator with manometer

REF.				
90020	18 lt	4,5 Kg	M 1/4"	M 1/4"

SSP 10

- **Internal removable tank:** aluminium
- **Safety valve and product pressure regulator**
- **Coupling for 1 spray gun**
- **Product pipe rapid washing system**
- **Cover:** aluminium, surface treated with black cataphoresis, closure with 4 tie-rods
- **Container:** steel, treated with black cataphoresis
- **Fittings and internal components:** stainless steel

REF.				
90018	5,5 lt	13,5 Kg	M 1/4"	M 1/4"

SSP 10PL

- **Safety valve and product pressure regulator**
- **Coupling for 1 spray gun**
- **Material outlet at bottom of tank:** for dense product
- **Cover:** aluminium, surface treated with black cataphoresis, closure with 4 tie-rods
- **Container:** steel, treated with black cataphoresis
- **Fittings and internal components:** stainless steel

REF.				
90018 PL	10 lt	14,5 Kg	M 1/4"	M 1/4"

29

SSP 24

- **Internal removable tank:** polyethylene
- **Safety valve and product pressure regulator**
- **Coupling for 2 spray guns**
- **Product pipe washing system**
- **Product stirrer:** manual
- **Optional: Meet EEC standards**
- **Cover:** steel, surface treated with black cataphoresis, closure with 5 tie-rods supplied with seal toroidal gasket, complete with tap in zinc steel
- **Fittings and internal components:** stainless steel
- **Container:** black cataphoresis, with reinforced top

REF.				
90019	16 lt	34 Kg	M 1/4"	M 1/4"
90019/CE EEC version	16 lt	34 Kg	M 1/4"	M 1/4"

SSP 24 PL

- **Safety valve and product pressure regulator**
- **Coupling for 2 spray guns**
- **Product stirrer:** manual
- **Material outlet at bottom of tank:** for dense product
- **Optional: Meet EEC standards**
- **Cover:** steel, surface treated with black cataphoresis, closure with 5 tie-rods supplied with seal toroidal gasket, complete with tap in zinc steel for adding product
- **Fittings and internal components:** stainless steel
- **Container:** black cataphoresis, with reinforced top
